

## **Harry Anderson (Andy) Page**

### **President and CEO, Oak Ridge Associated Universities**

Andy Page is President and CEO of ORAU. He provides comprehensive oversight, strategic direction and leadership for ORAU and its diverse set of missions involving STEM workforce development, scientific assessment, worker health, environmental management and radiological emergency response.

Page works closely with government agencies and the academic community to secure new programs and partnerships to further enhance ORAU's national and international reputation. ORAU's flagship contract is the Oak Ridge Institute for Science and Education (ORISE), which we manage for the U.S. Department of Energy (DOE), our largest customer. ORAU also supports various DOE National Laboratories—such as Oak Ridge National Laboratory, National Energy Technology Laboratory and others—with STEM internship and fellowship programs to help build the pipeline of future scientists and engineers. Other federal agency partners include the Nuclear Regulatory Commission, the Department of Health and Human Services, the Department of Defense, the Department of Homeland Security and the Centers for Disease Control and Prevention. On the academic front, ORAU actively works with a 121-member university consortium that boasts some of the most prestigious institutions of higher learning in the country.

Before becoming president, Page was vice president and director of ORAU's National Security and Emergency Management Program, supporting the DOE/National Nuclear Security Administration Office of Emergency Response. He has also managed ORAU's counterterrorism readiness programs for other government agencies, including the U.S. Department of Homeland Security, the Federal Bureau of Investigation, and the U.S. Department of State, as well as the Bureau of Reclamation's National Critical Infrastructure Dam Program, and the State of California's Homeland Security Exercise Evaluation Program. Page was a certified member of both the DOE/NNSA Nuclear Incident Team and the Senior Energy Official Incident Management Team.

Prior to joining ORAU in 1999, Page served nearly 25 years with the U.S. Marine Corps. He was a commanding officer in the Marine Corps Fleet Marine and Security Forces, served as deputy branch head of amphibious ships and programs at the Pentagon, and served in high-level staffing assignments at Marine Corps Headquarters in Washington, D.C. He was one of only 11 senior-grade officers chosen to represent the Marines at the National Defense University's Industrial College of the Armed Forces, a prestigious senior service school that provides graduate level education to senior members of the armed forces.

Page holds three master's degrees: in management from Webster University, in education from Old Dominion University and in national resource strategy from the National Defense University. He also earned a bachelor's degree in history from The Citadel. He serves on the board of directors for the East Tennessee Economic Council and the Oak Ridge Public Education Foundation. He is a member of the UT-Battelle Board of Governors, institutional liaison for the Tennessee Valley Corridor Board of Directors, and a member of the Covenant Health Leadership Academy Class of 2017.
