

**Joe Estey**

**Moderator – Leadership Engagement Roundtable**

Starting as a chemical utility operator for Westinghouse Electric Corporation in 1978, Joe Estey served as a foreman, manager and director of operations for three chemical manufacturing facilities prior to starting Prolepsis Training. In 1998, Joe was appointed a fellowship by the Consortium of Western Universities in recognition of his achievements in environmental science education having published three national curriculums on sustainability and industrial ecology used in elementary, secondary and post-secondary educational institutions across the United States. Serving as the Principal Performance Improvement Specialist for Lucas Engineering and Management Services in 2016, his responsibilities include: working with a diverse clientele including forest products and construction contractors, fossil generation and nuclear power utilities, R&D laboratories and public agencies, to identify and eliminate undesirable events through the management of human error.

Recent clients for which Estey routinely provides Leadership Training and Operational Excellence to:

- Northwest Public Utility Districts
- KapStone and Rock Tenn Container Corporations
- CH2Mhill Environmental Remediation Projects
- Columbia Sportswear Leadership Experience at Accelerated Pace (International Manufacturing))
- Hilcorp Oil and Gas Exploration (Alaska and Texas)
- Weyerhaeuser Forest Products and Land Management
- Luminant Power/Energy Future Holdings (Texas)
- National Laboratories including NREL(Colorado), PNNL (Richland/Sequim) and LLNS (CA)

He has been elected to three consecutive terms as a Board Director of the Human Performance Root Cause and Trending Organization (HPRCT.org). As the recipient of three National Awards from the White House Executive Leadership council for his work in public outreach and education, he frequently speaks to public agencies, corporate and small business managers and front-line workers across the United States.
