

U.S. DEPARTMENT OF
ENERGY

Office of Science
ORNL Site Office

Johnny O. Moore Bio/Education/Certifications

Johnny O. Moore is the U.S. Department of Energy's Oak Ridge National Laboratory Site Office manager responsible for management of the operation contracts for the ORNL and Oak Ridge Institute for Science and Education; providing operational oversight and assuring regulatory compliance of contractor operations; providing effective federal stewardship of DOE resources; and managing federal resources to assure effective and efficient operations.

During more than 30 years of federal service with DOE, Mr. Moore has developed a diverse professional background. Prior to becoming the manager at the ORNL Site Office, Moore served as the deputy assistant manager for Science, operations division director for ORNL, waste operations and technical team lead for the Oak Ridge Office Environmental Management organization where he led waste operations and legacy waste disposition activities. He has also served as the acting site manager for the Portsmouth (Ohio) Site Office and the environmental technology group leader, as well as having served as the technology development and transportation team leader.

Moore earned a bachelor's degree in chemical engineering from the University of Tennessee, is a registered professional engineer in the state of Tennessee, and is a member of the American Institute of Chemical Engineers.
